## Want customers to find you?

Monument dealers everywhere have been using NAME PLATES to identify their best work. Our name plates will bring you new customers.

**ANODIZED ALUMINUM** – Black or silver color – .020" anodized aluminum is printed using a metalphoto process similar to a photograph allowing for crisp, detailed graphics especially well-suited for logos or QR codes. Superior performance when exposed to extreme temperatures, moisture, acid and salt spray. Anodized aluminum will not rust. Excellent durability in all weather.

**STAINLESS STEEL** – Silver color only – .020" stainless steel is our strongest metal offering. Letters and any graphics are chemically etched and filled. Stainless steel does not rust. Excellent durability in all weather.

### BENT Monument Name Plates

Standard BENT plate is 1 1/2" wide with a 90 degree bend. The face (where we add your company information) is 3/4" wide. Lengths can be **2", 2 1/2" or 3"**. The 3" long is the most popular. The 2" length is small to fit a lot of info, but it is more discreet.

### FLAT Monument Name Plates

Standard FLAT plate is 1 1/2" wide. There is a blank area at the top of the plate, which is slipped under the headstone. The bottom 3/4" is where we add your company information. Lengths can be **2", 2 1/2" or 3"**.

### 3/4" Flat Monument Name Plates with Adhesive

Standard FLAT PLATE WITH ADHESIVE measures 3/4" wide like the styles pictured below. The adhesive is 3M peel and stick, formulated to specifically adhere to stone. More versatile - you can place the plate anywhere on any type of structure. **Lengths can be 2", 2 1/2" or 3"**.

### Name Plate Styles

**STYLE A**  
Black Letters

**STYLE B**  
Black Letters and Line

**STYLE C**  
Silver Letters on Black Panel

**STYLE D**  
Silver Letters on Black Anodized Aluminum
