The PATENTED
PadHead™
polishing & grinding head

Velcro attachments for polishing pads & abrasives, round brushes, and metal bond diamonds.

Miles Supply's PadHead™ polishing & grinding head is the most unique tool on the market for surface treatments. Hone, polish or texture flat surfaces on your CNC.

The PATENTED multiple free rotating heads work off of the resistance of friction to accomplish its superior surface cutting action.

Up to 50% faster using diamond pads than traditional abrasives and plates!

Patented models of the PadHead™ polishing & grinding head

Faster Grinding! ... up to 50% faster
Reduced Dust Particles/Slurry
Low Cost per Square Foot
Highest Quality Finish

Model II as applied on a Patch Kit & for flat polishing machines

Model C for CNC machines

Multiple Materials:
- granite
- concrete
- marble
- limestone
- engineered stone
- sandstone, & more...

Features of Model I include:
- Self-leveling floating heads
- Follows contours for serp tops & top polishers
- Velcro attachments

WHY UNIQUE & REVOLUTIONARY?
The THEORY: Traditional polishing systems force abrasives in one direction creating dull cutting forces resulting in fractured crystals. PadHead™ wears the crystals, rather than fracturing them, providing a more brilliant finish with greatly reduced dust and slurry accumulation.
